Step 3

- Remove three medium length screws from the bottom of the camera
Step 4

- Remove the two medium length screws on the front panel of the camera above the lens mount.

- Once you done, you may use the Spudger to panel from non-grip side.

- ⓘ If you start on the grip side, it will be more challenging to loosen the panel.

Step 5

- Remove the three long black screws from the bottom using a #00 Phillips screwdriver.

- Use tweezers to lift the panel.

Step 6

- Once you have detached the back cover, use a pair of tweezers to lightly pull on strap found connecting the back cover to the camera.
