Step 7

- Gently separate the top of LCD from the rest of the camera using your thumb.

⚠ Be careful not pull the LCD too far because of the ribbon cable connection.

- Place the Spudger in the hole of the electrical ribbon.

- Gently pull the ribbon down using the Spudger until it is free from the camera but still connected to the LCD.

ⓘ The LCD will still be connected to the rest of the camera

Step 8
- Unscrew single Phillips screw with a #0 Phillips screwdriver.

- Free the bottom panel and attached ribbon from the rest of the camera.

- ⚠ Be careful not to damage the ribbon.

Step 9

- Turn over the camera.

- Lift the clear plastic from the face of the camera, peeling the adhesive just below the zoom lens.

- ⓘ The plastic will still be connected on the left side.
